- Consulting For Success

DO-178C

Feedback we have seen stated that the publication date will be early to mid 2011. Apparently, the core looks almost identical to the existing DO-178B. The technical supplements are "add-ons" if you are using a particular method or technology. The feedback further states that the "updated" document is likely to make all our lives a bit more complicated at best.

It's Just Around The Corner!

A Unique Offering

Event: System Safety Course

Date: August 16-20

Venue: Hilton Garden Inn

Location: Williamsburg, VA

Free MS-ACCESS hazard tracking database.

MIL-STD-882D Change 1

Thanks to Kuper Haim, you now have a link to this draft standard:

<http://www.ndia.org/Divisions/Divisions/SystemsEngineering/Documents/Major%20Current%20Tasks%20and%20Activities/MIL-STD-882D%20Review/DRAFT%20MIL-STD-882D%20wChange%201%202010-03-29.pdf>

We had a copy that we acquired a few months ago from Chuck Dorney but assumed that the document was confidential.

Thanks Kuper!

SAE ARP4761A

No news yet.

IEC 61508-2010 Feedback

Thanks to Lauri Ora, we can now provide you with some insight.

Please see:

<http://www.tuvasi.com/en/news/9th-international-symposium.html>

Lauri states that "The first link on the page is to a presentation by Mr. Heinz Gall titled 'New Developments of IEC 61508 - 2nd Edition' gives a very brief summary of the changes."

Thank you Lauri!

A Curious Webinar

Recently we were requested, by one of our clients, to prepare and present a webinar entitled "System Safety - How to Surpass your Competitors". This webinar, which focused on the bidding process, serves to illustrate how competitive things have become during these very challenging economic times.
