65th Annual Reliability and Maintainability Symposium

January 28-31
Orlando, Florida

<http://www.rams.org/>

Safety-Critical Systems Symposium 2019 (SSS'19)

February 5-7 2019
Bristol, UK
Bristol Marriott Royal Hotel

www.scsc.uk/sss

For Your Pleasure: A Few Quotes From Albert Einstein

One must divide one's time between politics and equations. But our equations are much more important to me, because politics is for the present, while our equations are for eternity.

I was sitting in the patent office in Bern when all of a sudden a thought occurred to me: If a person falls freely, he won't feel his own weight. I was startled. This simple thought made a deep impression on me. It impelled me toward a theory of gravitation.

[Planck] was one of the finest people I have ever known ... but he really did not understand physics, [because] during the eclipse of 1919 he stayed up all night to see if it would confirm the bending of light by the gravitational field. If he had really understood the general theory of relativity, he would have gone to bed the way I did.
