

Newsletter—February 2010

On-Line Course Brochures

Full sets of brochures, for both Williamsburg and on-site courses, are now available on our web site covering 4 courses.

On-line Payments

You can now pay on-line for Williamsburg courses, webinars, and DIDs.

New York Times

The New York Times has expressed interest in writing a feature story about us.

Questions From Our Readers

Q. Our company's environmental safety policy is two sentences long. How large are the policies that you have produced for clients?

A. Typically, they are between one and two pages in length.

Q. Do you provide sneak circuit analysis services?

A. No. We will refer you to organizations that do.

Q. Do you provide bent pin analysis services?

A. No. There are organizations that do. We know of one that developed a software tool to augment this type of analysis.

Q. Do you provide system safety courses which focus on UAVs?

A. Yes.

Q. We represent a customer that is considering the purchase of a light rail transit system. What should look for regarding its safety?

A. We created a tutorial called "System Safety For Rail Transit System Acquisition" which addresses this. This tutorial identifies potential loopholes and provides system safety guidance to the purchaser of these types of systems. We are planning to convert this tutorial into a webinar.

Q. For building security should the Threat & Vulnerability Analysis be used to influence the architectural design?

A. Definitely.

Full RSAC Meeting

HCRQ will be attending this meeting which is to be held on February 11. We will be representing Cattron Group International (CGI).

Perhaps we will see some of you there!

2010 Course Offerings

We have announced courses and webinars throughout this year.
