

## Newsletter - July 2016

### Happy 1st, 4th

HCRQ wishes our Canadian friends  
*happy July 1st*

and our American friends  
*happy 4th!*

We wish you and your loved ones  
good health and happiness.

### Now 2600 Readers

Thank you one and all for  
subscribing!

Please feel free to submit any  
articles, announcements, etc.

### Webinar Discount

In celebration of our 7th year  
teaching webinars we are offering  
a 20% discount during the month  
of July.

### Fault Tree Analysis Acceptance/Rejection Criteria

There are 20 attributes to look for  
(coincidentally it turned out to be a  
round number).

This year has seen an increase in  
Government interest in this list.

### Confusion Abounds

Perhaps, as a supplier of safety-  
related systems, you have seen  
RFPs which are quoting conflicting  
safety standards (e.g., MIL-STD-  
882E and SAE ARP4761). We have  
been approached for help by  
winners of the associated  
contracts.

### On-Site Courses Currently On Our Horizon

- Architect of the Capitol
- Thales Australia
  - including Boeing Defence

### QA/QC/SQA

HCRQ is continuing to see an  
increase in interest in these areas  
by end clients largely due to  
inadequate attention being  
provided by suppliers resulting in  
poor quality, delays, and financial  
loss.

### SSPP Involvement

This year we have witnessed an  
increase in interest in:

- reviewing SSPPs, or
- assisting with the production  
of SSPPs, or

We also offer a sample SSPP:  
<http://www.hcrq.com/system-safety-program-plan-sspp-example.html>

### FMEA Format Wrong

We are looking forward to the  
updated SAE ARP4761. Hopefully it  
will correct this problem.
