

## Newsletter - July 2017

### Pending Courses

- System Safety  
July 24-27
- Hands-On FTA  
August 8-9
- Software Safety  
August 21-24

Join the long list of organizations that have attended our courses - <http://www.hcrq.com/previous-course-attendees.html>

Book now and save.

### 35th International System Safety Conference

- Albuquerque, New Mexico
- August 21-25
- <http://issc2017.system-safety.org/>
- See you there!

### Need for Certification

We continue to see "system safety engineers" who are far from expert in their chosen field.

This is especially evident in the North American rail industry. Some are knowledgeable of only certain aspects of these systems; some know nothing about software safety; some know nothing about FMEA/FMECA; many are lacking solid expertise in fault tree analysis just to name a few aspects.

### In-depth Webinars

- SSPPs
- SwSPPs
- PHA & HL
- O&SHA
- SwFTA and SwFMEA
- System Safety - If You Were Us (end client), What Would You Watch Out For?
- and more
