

Course/Webinar Important Announcement

If all goes well, HCRQ will be awarded a significant multi-year contract in June.

If this takes place, it will no longer be possible for us to schedule open courses and webinars.

For this reason if you are considering attending a course or webinar with us, we encourage you to register as soon as possible.

Please note; however, that we will continue to support on-site courses such as the one below.

NASA Course

HCRQ is pleased to announce that this summer it will be teaching a customized software safety course to the NASA Johnson Space Center.

FRA Locomotive Safety Standards Rule

You will recall that the NPRM was published in January 2011.

Originally scheduled to be released as a rule in January 2012, we understand this rule is still in process with the Office of Chief Counsel.

New Webinars

Since our last newsletter in January, we created 2 new webinars:

- Government Contracts: Prime Contractor System Safety: What To Look For
- Threat and Vulnerability Analysis

MIL-STD-882E

Attendance has been good at our webinar "Preparing For MIL-STD-882E". So too has been the feedback from its attendees. These people are now aware of the impacts that this standard will have on their system safety and software safety efforts in the future.

30th International System Safety Conference

August 6-10, 2012
Atlanta, Georgia
