Courses Taught by Webinar

It is becoming increasingly popular for organizations (e.g., based in Canada, Europe, Far East) to request these types of courses.

The effect is lower cost due to

- no travel and living expenses,
- no time lost in travel and, if applicable,
- no visas required.

The audience still sees the instructor, is able to interact with him, see the white board and, of course, have hard copies of the course notes in front of them.

For further information email training@hcrq.com.

MIL-STD-882E System Safety Course

Dec. 6-8, 2016
<http://www.hcrq.com/mil-std-882e-system-safety-course.html>

Here in Williamsburg, Virginia

This course is also being taught the same week to a client of ours in Brazil.

How To Get Promoted

This webinar remains very popular and has received many compliments.
