\*Save on travel time and expenses, attend on-line.

Or book your own live on-line course at a time convenient for you.

### MIL-STD-882E Challenges

During our last MIL-STD-882E system safety course, some real dilemmas were tabled by attendees:

- How can one cope with the situation where one is the only system safety engineer on the project? E.g., how can one hope to put together a comprehensive PHA?
- What if one has not been involved in the bid and, as a result, there are limited funds available to perform the system safety effort?
- What if MIL-STD-882E is quoted by the customer but associated tasks have not been specified.
- Does an FHA substitute for a PHA?

Piqued your interest?
