

Courses !!!

Renewed interest in our courses as prompted the recent announcement of several offerings.

Visit
www.hcrq.com/scheduled_courses.html
for information regarding the following.

Software Safety Course

Our 3-day course in Williamsburg is just around the corner—December 1-3.

Aviation System Safety Course

This 3-day course is scheduled for January 19-21.

Fault Tree Analysis Course

With a wrinkle—this one is hands-on.

This 2-day course is scheduled for January 26-27.

Software Process ?

It's question time !

If one follows a particular process when developing safety-related software and there is proof of such, what does this infer regarding the safety of the software?

E-mail us and we will provide you with the answer.

Safety Case Issues

Safety cases are built using claims, arguments, and evidence.

Arguments may be deterministic, probabilistic or qualitative. This is the order of precedence from most preferred to least preferred.
