Quiz - Identify Hazard Mitigators

1. Fire Extinguishers
2. Crashworthiness
3. Air bags

Answer: None of them. They are ameliorators.

PHA & Hazard Tracking Webinar

- www.hcrq.com/preliminary-hazard-analysis--hazard-tracking.html
- **Attended by 272 people to date**
- Contact us: info@hcrq.com

You Might Be A System Safety Engineer If

- You prepare an emergency response plan for your 4th of July picnic.
- You see jaywalking against a "Do Not Walk" signal as proof that warning devices are not effective hazard controls.
- The only way your significant other can get your attention is to throw the word "mitigation" into the conversation.
- You have books on accidents and disasters prominently displayed in your home.
- You try not to think about the residual risk during your flight, but you can't help yourself. Unfortunately, you share this knowledge with your fellow passengers.
